PROFILE

Motivated Software Development Intern with hands-on experience in **Python and SQL**, focusing on backend development using **Django and FastAPI**. Skilled in **writing SQL queries and debugging**, with version control knowledge using **Git**. Quick learner with good problem-solving skills and a keen interest in contributing to real-world development projects while growing in a collaborative, fast-paced environment.

EDUCATION

B.Tech (CSE) Narsimha Reddy Engineering College  CGPA : 8.80	Present Hyderabad
Intermediate (MPC) Sri Vijay Sai Junior College  Percentage : 95%	2023 Bodhan
SSC Vamsi High School  Percentage : 100%	2021 Bodhan

SKILLS

Python | SQL | HTML | CSS | Git | GitHub | FastAPI | Django | PostgreSQL | Render | Prompt Engineering |
Personality Traits : Adaptability, Leadership, Fast Learning.

PROFESSIONAL EXPERIENCE

Full-Stack Python Intern – Infosys Springboard  • Developed full-stack web applications using Python, Django, and React. • Built and integrated REST APIs for frontend-backend communication. • Wrote optimized SQL queries and managed PostgreSQL databases. • Debugged applications and followed Git-based version control during development.	11/2025 – 02/2026 Hyderabad
Android App Development Intern - Shaaka  • Integrated Flutter application with optimized Django REST APIs. • Improved backend performance through API optimization and database tuning. • Deployed the application on Render using production deployment practices.	10/2025 – 12/2025 Hyderabad

PROJECTS

Shaaka  E-Commerce Android App Tools & Technologies: Flutter, Django Rest API, NeonDB Role: Lead Backend Developer Purpose: An Android app for farmers and women merchants Outcome: Built and upgraded a farmer-merchant Android app to improve market access and user engagement. Led API optimization efforts, reducing response time and enhancing platform reliability and scalability.	10/2025 – 12/2025
TalentLink  Job Portal & Recruitment Management Platform Tools & Technologies: React, Django Rest API, PostgreSQL, Render Role: Solo Developer Purpose: A platform designed to connect job seekers and recruiters by streamlining job postings, applications, and contract management. Outcome: • Independently designed, developed, and deployed a Full-stack job portal using React, Django Rest API, and PostgreSQL. • Developed secure REST APIs with authentication, role-based access control, and optimized PostgreSQL database operations	11/2025 – 01/2026
CodeStorm-2026 & Ignite-2K26  Event Management & Hackathon Websites Role: Frontend and Backend Developer Purpose: Developed official event websites to manage registrations, participant details, schedules, and real-time updates for college hackathons. Outcome: Designed and developed responsive event management websites with secure registration systems, backend API integration, and optimized database operations.	01/2026 – 02/2026

CERTIFICATES

- Achieved a Git-Certified Python Developer Certificate, issued by GeeksforGeeks in 2025. 
- Earned an Android Developer Certificate, issued by EduSkills and Google for Developers & AICTE, in 2025
